INTRODUCTION

HATTELAND®
DISPLAY

Hatteland Display is the leading technology provider of maritime display and computer products. We deliver high quality, unique and customized solutions to the international maritime market. The company represents innovation and quality to system integrators, ship yards and boat builders worldwide. Effective quality assurance and investment in sophisticated in-house manufacturing methods and facilities enable us to deliver type approved and Mil tested products.

Hatteland Display has successfully delivered over 230,000 products to the maritime industry since 1989, where more than 30,000 units of these are Panel Computers in the last 5 years. Our customer oriented approach, technical knowledge and dedication to R&D, make us a trusted and preferred supplier of approved solutions, which are backed up by a strong service network.

As the market leader in the commercial marine segment, Hatteland Display is setting the standard in the industry. As technology evolves, we take pride in providing long term support for our products, while at the same time developing new cutting edge solutions for the future. Two of our customers had this to say:

"Dealing with ever-changing technology is always a challenge; but when you have a trusted partner with a knowledgeable and responsible team like Hatteland Display, you don't need to worry about getting into trouble".

"Hatteland Display provides high quality and innovative products supported by a very capable organization".

We take pride in being flexible and always putting our customers first. Our dedication to our customers has been recognized by the market. Another one of our customers commented on their experience:

"You can get in touch with Hatteland Display's sales managers anytime, anywhere. Whether on the road, at the office, or in an airport, your call is answered, your SMS is taken, your email is replied, and your concern is attended".

Hatteland Display's products and organization can be described through our core values: **QUALITY – KNOWLEDGE – VALUE**. We live in these values every day and aim to be a provider of Trusted Solutions to the marine market well into the future.

We hope you find the products and solutions that are illustrated in this catalogue of interest and suited for your needs. We are ready to support you if you have any questions.

Kind regards, The Hatteland Display Team

HATTELAND DISPLAY ECDIS CALIBRATION

Color calibration of the display is a very important aspect of ECDIS. ECDIS represents one of the most rigorous applications in display technology for our industry.

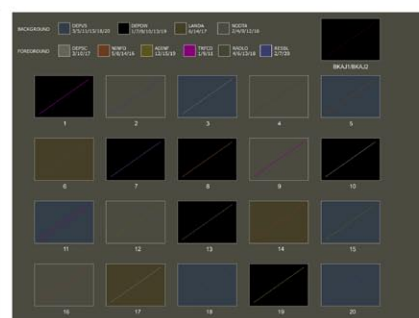

The consequence of making an error in recognition on the display is potentially very costly, therefore it is important that ECDIS monitors match the colour characteristics specified in the relevant standards. Hatteland Display provides both computers and displays to facilitate an overall ECDIS approved installation.

WHY CHOOSE COLOR CALIBRATION BY HATTELAND DISPLAY?

- With our extensive technical knowledge and experience, we can deliver the best quality type-approved ECDIS displays fulfilling IMO requirements;
- All configurations meet the requirements set in IEC 62288 2nd, IEC 62388, IEC 61174 and IEC 60945.
- Hatteland Display ECDIS calibration overcomes all problems associated with different display properties, to ensure correct matching between the standards and the actual products.
- Calibration service is supplied with detailed implementation instructions and extensive support.
- Hatteland Display calibration is the most flexible system, and that can even be used with several types of graphic adapters at a time.

ENHANCED SUNLIGHT READABILITY THROUGH IN-HOUSE OPTICAL BONDING

Optical bonding greatly enhance the viewing performance, reliability and lifespan of marine displays. It is a process whereby the air gap between the front glass panel and LCD module is filled with a special proprietary compound to negate all of the problems related with marine use such as condensation, sunlight reflection, dust and overheating.

Hatteland Display is dedicated to the art of LCD optical bonding. It is the only such in-house facility of its kind at a marine display manufacturer, and it allows us to provide proprietary added value whilst ensuring the quality and integrity of our display products and technology.

INNOVATIVE HMI

Within a system, the display provides the primary Human Machine Interface (HMI). Innovative HMI solutions open up new possibilities for the system integrator. Our products can be supplied with touch screens as an option. There are many touch screen technologies available, and we have implemented several of them in our solutions.

Main usability, performance and integration characteristics are:

Technology	Optical Performance	Stable Calibration	Gloves	Water	Durability	Price	Multitouch
Analog Resistive	--	+	++	++	-	++	-
Surface Capacitive	++	-	--	-	+	-	-
Projected Capacitive	++	++	+	+	++	+	++

Series 1 can be offered with either resistive or surface capacitive touch screen in most cases, Series X is designed with projected capacitive providing multitouch support.

MULTITOUCH

Multitouch is defined as the ability to recognize two or more simultaneous touch points. Using projected capacitive technology lets us create a more intuitive form of human-device interaction. Touch-interface gestures, supported by projected capacitive sensors, can simplify the interface and provide an intuitive user experience that goes beyond the typical “button replacement” found in most simple touch interfaces.

Moving the active sensor area on the backside of the protection glass makes the system very durable and not sensitive to surface damages like dirt, scratches etc.

Glass Display Control™ (GDC):

A well implemented touch interface can be much simpler to use than a conventional mechanical button-based interface because it can show the user only those controls that are relevant to a particular operation, while all the controls in a conventional interface are always present. Our new display control solution, which we refer to as Glass Display Control™, or GDC, is based on projected switches, and have these benefits, and more;

- **Solid state** - reliable.
- **Behind the glass sensors** - don't wear out.
- **No moving parts** - nothing to break, everlasting.

GUARANTEED RELIABILITY THROUGH TESTING & TYPE APPROVALS

All Hatteland Display products are normally tested and type approved to the required standards by the major classification societies, ensuring our displays, computers and panel computers are fit for the harsh environments encountered at sea.

We also provide dedicated ECDIS calibration which enables us to deliver type approved ECDIS displays straight from the factory to you. Products are normally type approved or in application for Type Approval by the following major classification societies:

Standard:

EU-RO-MR (Recognised Organisations Mutual Recognition)

which covers;

ABS (American Bureau of Shipping), BV (Bureau Veritas),
ClassNK (Nippon Kaiji Kyokai), DNV (Det Norske Veritas),
GL (Germanischer Lloyd) and LRS (Lloyd's Register of Shipping).

Optional (also covered by EU-RO-MR):

CCS China Classification Society
KR Korean Shipping
RS Russian Maritime Register of Shipping

To ensure the above mentioned type approvals, the products are tested by independent institutions according to the following standards, **where applicable:**

EN61174 - (IEC1174) Bundesamt für Seeschifffahrt und Hydrographie (BSH)

EN60529 - IP protection classes.

EN61162 - (IEC1174) Maritime navigation and radio communication equipment and systems.

EN60945 4th

IACS E10

For MIL Qualified products:

MIL-STD-461
MIL-STD-810
MIL-STD-167-1
MIL-S-901D, Grade A, Class 1
Extended IEC 60945
TEMPEST SDIP-27

TECHNICAL DEVELOPMENT

In addition to providing high quality standard technical solutions our company continues to set new standards through the introduction of new technologies and capabilities.

Optical Bonding

Developed in-house, our unique, proprietary bonding technology prevents fogging and produces the best optical quality.

Read more on page 5.

3-D Modeling and Simulation

Our engineers use state-of-the-art design tools to minimize design cycle times and integration risks.

Video System Design and Integration

Our engineering staff is experienced in electronic design of critical analog and digital video circuitry.

ECDIS Solutions

Hatteland Display sets the standard for type-approved ECDIS solutions, including automated generation of color calibration tables. We are also the premier supplier of MIL-S-901D qualified ECDIS certified displays.

TESTING AND CUSTOMIZATION

Hatteland Display works closely with systems integrators to ensure our products meet the most demanding requirements for maritime and naval applications.

Environmental Qualification Testing and Type Approval

Hatteland Display's knowledge of international shipbuilding standards and military specifications, coupled with our experience in qualification and certification of products to these standards is unsurpassed.

Test Facilities

Hatteland Display's test laboratory is capable of performing in-house Highly Accelerated Life Tests (HALT) as well as a range of tests in accordance with IEC60945 to constantly improve products' quality. Selected test equipment consists of: EMI/EMC Chamber, Climatic Chamber, Vibration Table, Heat Chambers and Thermographic Camera.

ISO-9001:2015 Approved Processes

Hatteland Display's quality system covers all functional areas and facilities to ensure the quality of our work products.

GLASS LOGO ENGRAVING

Available for the Series X product range, we offer a high-tech factory applied logo-branding option, thanks to an in-house precision Laser Engraving process. The logo engraving is suitable for virtually any style of customer logo or slogan and is possible to apply to the back or front of the Series X glass, with or without Multi-Touch Screen. Contact our Sales Department for further details.

WORLDWIDE PRESENCE

As part of our lifecycle management we place a huge amount of emphasis on support and have built up a strong network to ensure that we can act fast when you most need us. We provide depot-level repair at all of our global service partner locations.

We use an automated customer service application to facilitate returns. Access to stock spare parts locally and the provision of training completes the basis of our commitment to extending the lifecycle of all Hatteland Display products, making sure that your critical systems are always operational.

DISPLAYS SERIES X MVD MULTI VISION DISPLAYS

Hatteland Display, the leading global provider of display and computer solutions for professional maritime use introduces the innovative 55 inch Ultra High Definition product range. Integrating the cutting-edge of flat panel technology, the clarity, colour range and size of Hatteland Display's flagship Multi Vision Display system is a key enabler of safer navigation and future maritime bridge design.

The concept of a large 4K resolution Chart & Planning Table and the Floor Tilt Model was born out of a realisation that maritime display technology evolution is vital to improving the effectiveness of modern bridge systems.

As a 55 inch display, it provides the size needed to integrate system data in a single display, enabling Integrated Bridge System (IBS) and navigation technology manufacturers to combine multiple data from ship systems into a single, multi-touch enabled and user-friendly system. Crucially the 4K resolution ensures that multiple data types can be easily viewed under all conditions.

The new 32 inch Series X MVD features the same 4K screen resolution as the flagship Series X 55 inch Ultra High Definition Chart & Planning table. Both 32 and 55 inch displays are ECDIS and Radar Compliant.

DISPLAYS SERIES X

As a leading manufacturer of display and computer hardware for the maritime segment, Hatteland Display continuously gauges and responds to market needs. Our commitment to develop specialized products for a multitude of onboard ship systems continues with Series X.

With cast aluminium, compact (IP22) and sleek by design chassis, the units from this new range can be desk mount or console integrated. The design is modular, allowing for common modules to be used in various models and combinations. Together these design features bring about a range perfectly in synch to market cost expectations – along with that, the performance and type approval always expected in all Hatteland Display products.

GENERATION 2 (G2)

In 2017, advancements for the Series X generation two MMD (Maritime Multi Displays) have been rolled out across the 15, 17, 19, 24, 26 and 27 inch models. For users, there is an improved Glass Display Control™ (GDC), GDC backlight uniformity and higher brightness for high luminance environments.

For engineers and installers, amongst the developments include improved serviceability, allowing for better access to key components. There is also a new table/ceiling mounting solution for the 15, 17 and 19 inch models.

- MULTITOUCH
- TYPE APPROVED
- ECDIS COMPLIANT
- IP22 REAR / IP66 FRONT
- SUPERIOR BONDING TECHNOLOGY
- MODULE BASED, TAILOR-MADE SYSTEMS MADE EASY!
- SUNLIGHT READABLE / HIGH BRIGHT VERSIONS AVAILABLE
- GLASS DISPLAY CONTROL™ (GDC), SOLID STATE MENU SYSTEM

All sizes are available in display or panel computer formats, as well as various performance specifications to choose from. There are standard base models available which are listed in the following pages.

The modules used in Series X, are all qualified having undergone and passed our extensive test program, which includes HALT testing. This means that the products are tested well outside the requirements in EN60945 and E10.

The result is a more reliable product.

HIGH BRIGHT

For SUNLIGHT READABLE / HIGH BRIGHT models, read more at page 56.

NEW

SERIES X G2

NEW FUNCTIONAL FEATURES

- Separate DVI-D and VGA inputs are now DVI-I inputs. (VGA to DVI-I adapter is required, when VGA input is selected).
- Support SCOM communication over USB (in addition to existing Serial and TCP).
- Support upload/download User settings in OSD menu over SCOM protocol.
- 2 x Composite video inputs as standard, 3rd one possible via option.
- DDC/CI communication protocol is supported for all signal inputs.
- External PWR button + I2C support on User interface connector.
- New SCOM commands, updated SCOM protocol.
- Added Display Port (DP) input.
- VGA out is standard.

NEW CHASSIS

- Improved Glass Display Control™ (GDC), higher brightness for high luminance environments.
- Mechanical construction updated, cut out dimensions are the same as before for all sizes.
- Serviceability is improved, allow for better access to key components, improved MTTR.
- Tie-wrap mounting points on terminal plates turned 45° to improve functionality.
- VESA mounting points on Back Side are replaced by separate VESA bracket.
- Improved GDC backlight uniformity.

SPECIFIC UPDATES, 15, 17 & 19 INCH

- The back of the chassis is slightly changed. Console cutout remains the same as before.
- Moved buzzer hole location, (on glass) 1.5mm upwards.
- Sides and back cover extends further down.
- New table/ceiling mounting solution.
- New VESA mount solution.
- New console mounting solution ----->
- Console mount flange is smaller.

SPECIFIC UPDATES 24 & 26 INCH

- 26 INCH: Weighs less (13.8kg / 30.4lbs) than current/previous model (15.6kg / 34.3lbs)
- 24 INCH: Weighs less (9.5kg / 20.9lbs) than current/previous model (11.0kg / 24.2lbs)
- 26 INCH: Depth of model changed from 91.80 [3.61] to 92.00 [3.62] mm [inch].
- 24/26 INCH: Rear Chassis Casing Box is smaller than current/previous model.
- 26 INCH: No vent openings on the Back Side.

GLASS DISPLAY CONTROL™

EXTERNAL REMOTE CONTROL FOR DISPLAYS

The remote controller enables the control of Series X (Generation 1) and Series X G2 (Generation 2) including the Multi Vision Display range (MVD) by providing instant key-pad functionality over RS-485/422 bus through the Hatteland Display SCOM Protocol.

The remote controller is a console mounting module, which through its three push buttons allows user interaction for the 6 key feature sets widely used (Brightness +, Brightness -, Menu, Navigation <, Navigation > and Power ON/OFF).

PANEL COMPUTERS SERIES X G2 (GENERATION 2)

The innovative second generation Series X Panel Computers portfolio integrates powerful Intel® Skylake processor-based computers, high quality display technology and advanced video processing, the second generation Series X G2 Panel Computers are the most powerful all-in-one computer/display solution available for maritime technology manufacturers and systems integrators available today.

The integrated nature of the second generation Series X Panel Computers also enables tangible cost savings for equipment manufacturers and systems integrators. The new Panel Computers provide the same power and picture quality as a standard

display and separate PC configuration, but with lower capital expenditure (relative to purchase of separate displays and computers) and installation costs, they can be used as the basis of cost reduction programs. This makes it possible for technology integrators to continue improving vital bridge applications while still retaining focus on cost for their partners and end-customers.

The expansion of the second generation Series X portfolio to include larger Panel Computer models provides more flexibility for equipment manufacturers to utilise the most powerful computers and highest quality displays in a wider range of vessel technology, especially on the bridge.

PANEL COMPUTERS SERIES X (GENERATION 1)

The Series X MMC range of products has been developed alongside the display versions, thus expanding the impressive footprint and impact of this Series X on the maritime market.

The considerable advances made by Hatteland Display over recent years in PC platform development is now enhancing further the panel PC offering. All Series X display sizes are available with state of the art PC technology integrated, designed and built for type approved maritime systems.

SUNLIGHT READABLE / HIGH BRIGHT

Series X Displays and Panel Computers with High Bright panels were designed for direct-sunlight conditions.

This technology provides higher light intensity without producing excessive heat. The image on the display maintains its clarity and color vibrancy even under the strongest sunlight conditions.

Series X High Bright panels are combined with our enhanced optical bonding technology to dramatically reduce reflection. Perfect for outdoor navigation stations or fly-bridges.

Also suitable for indoor pilothouses with high ambient light conditions.

Particularly popular in the leisure boat markets, Hatteland Display has incorporated high bright option into the bulk of the product range and across all the backbone versions MMD and MMC.

High Bright is by factory default delivered with bonding and can be combined with Multitouch screen.

DISPLAYS SERIES 1

With our dedication to innovation, we took our de facto industry standard Series 1 displays and set about improving them. The result is the Series 1 redesign, a new generation of innovative, rugged marine displays designed for any navigation and automation application, including ECDIS.

Although the new Series 1 offers a clear improvement on performance, functionality and value, we have ensured that it adheres to the Hatteland Display ethos of Form, Fit, Function, so you can harness the many innovative features, without making changes to your existing solutions.

Series 1 displays feature 0-100% dimming, and provide unmatched sun and night vision. All sizes can benefit from Hatteland Display's sophisticated Optical Bonding, which eliminates condensation and dust, and reduces reflection by over 90%. Together with advanced anti-reflective coatings, bonding enables you to see your display in bright sunlight without the need for extensive backlighting, which can cause overheating and a shorter product life cycle.

Series 1 introduces a number of signal input/output options, which can be increased by using the Multifunction Cable. Further customized cables are available to ensure that you can interface everything you need to with the greatest of ease.

All Series 1 models are built to last and designed to be reliable in harsh environments, while providing the performance and flexibility you expect. They are perfectly suited to use aboard a wide range of vessels including commercial ships, workboats, coast guard boats and navy ships.

COMPUTERS

Hatteland Display's range of type-approved marine computers is designed to perform in harsh environments while providing the performance and flexibility you expect.

We offer rack mount and black box / standalone computer solutions for every need. Our computers are used by system integrators, boat builders and end-users and can be found on all vessel types, all over the world. If you are looking for a high quality marine computer for navigation, monitoring or entertainment solutions, Hatteland Display can fulfil your high expectations at a reasonable cost.

Our computer range covers all eventualities and requirements. We offer a wide range of processor choices, SSD, HDD storage and power options, and solid state technology, neatly engineered within industry standard form factors such as 19 inch rack mount, 2U, 3U and 4U.

We continually develop our marine computers portfolio to make the best use of emerging computer technology so you can be sure that your Hatteland Display computer offers the power needed to run modern applications*, with the flexibility to be installed wherever you want, for any marine use.

EXTREME FLEXIBILITY !

NEW

The new HT B30 Compact Fanless Solid State solution. "State Of The Art" computer that offers the widest range of options even in the smallest form factor possible!

Example: 4 x Digital IN+OUT, 8 x NMEA COM, 4 x Gigabit LAN, 8 x USB, Triple Head Graphics Outputs, Multi-power (AC+DC) and even more.

ADD MORE FUNCTIONALITY!

Hatteland Displays IO module series concept for marine applications adds more functionality to your Maritime Multi Computers and Maritime Stand-Alone computers. They are available as regular factory options for the entire range of Series X Maritime Multi Displays, Maritime Multi Computers and as well as the latest Maritime Stand-Alone computers.

EXTERNAL VERSION

The external version provides flexibility for new installations and easy upgrade of already installed systems. In fact, any Hatteland Display product that has a USB2.0 port can take advantage of these External Modules for both legacy, obsoleted, current and future products as long as the software and firmware supports the Operating System. (Note: CAN module is only supported for Series X and newer computers). Fully compatible with all Hatteland Display latest generation products.

INTERNAL VERSION

CONNECT BY SECURE STANDARDS

All modules interfaces by using Terminal Block type connectors as listed below (included in delivery, where applicable):

2-pin MSTB 2,5/ 2-STF-5,08 BK	4-pin MC 1,5/ 5-STF-3,81	4-pin BCZ 3.81/04/180F SN BK BX	5-pin MC 1,5/ 5-STF-3,81	Secure cables with Screw Terminals

Suitable cable housing with strain relief (included in delivery, where applicable):

KGG-MSTB 2,5/ 2 (2-pin) KGG-MC 1,5/ 5 (5-pin)	BCZ 3.81 AH04 BK BX (4-pin) BCZ 3.81 AH05 BK BX (5-pin)

Product are delivered with 600.00 [23.62] mm [inch] USB Cable(s) [Type A] for connectivity towards Panel Computer or Computer. In addition, the appropriate amount of Terminal Block type connectors and Cable Housings. For DSUB and LAN based External Modules, no cables are delivered with the product.

CAN

The CAN Module is delivered with software download functions and standard API, SAE J2534, which allow the user to add their own functions, such as real time critical functions, and high level CAN protocol. The CAN Module can operate as a standalone unit, which can be configured to operate independent of application software and hardware. Withstands marine requirements, General and open architecture that will allow the end customer to modify and handle the source code, General CAN interface support, NMEA2000, J1939 and CANOpen.

NMEA / COM

The NMEA COM Module (isolated) provide the system with quad independent COM channels (RS-422 / RS-485) and is fully tested and approved for ECDIS, IEC 61162-1/2 (NMEA 0183). Outputs are short circuits protected. Inputs are protected.

The COM Module (non-isolated) provide the system with quad independent COM channels (RS-232).

Both Modules: Application software access the COM channels as standard COM devices, i.e. in the normal case is there no requirements for additional software development.

DIGITAL IO

The DIO Module provides system integrators with an integrated control solution that reduces development time and enhances the performance of automation control systems such as (Low power / Relay control, Medium power buzzer, Indicator lamps and Electrical motors) as some typical examples. The DIO Module has 4 isolated digital outputs and 4 isolated digital inputs (independent).

LAN

The LAN (USB->Ethernet) Module provide the system with dual independent Ethernet ports (10/100Mbps).

Application software access the ethernet channels as standard ethernet devices, i.e. in the normal case is there no requirements for additional software development.

- All modules has support for Microsoft® Windows® as well as a selected choice of Linux operating systems.
- All modules are IEC 60945 4th (EN 60945:2002) and IACS E10 approved.
- All modules are available as internally mounted card or as External Cased Module, USB connectivity.
- Internal Modules are supported on Series X Displays and Panel Computers (where applicable), as well as for Computers.

MIL QUALIFIED PRODUCTS

Displays and computers are the critical link between the combat operator and today's mission-critical systems. As the leading international supplier of rugged marine displays, computers and panel computers, Hatteland Display understands the importance of product quality, reliability and performance. With over twenty years experience, Hatteland Display has established sophisticated design techniques, meticulous manufacturing processes, stringent testing programs and world-class quality control systems that reduce risk and total cost of ownership for our customers.

Whether your need is for COTS or custom product solutions, Hatteland Display is dedicated to becoming a dependable link in your supply chain and logistics support network.

Through continual expansion and improvement of our development and manufacturing facilities as well as our global support network, customers worldwide have gained confidence in the quality and value of our products and solutions, and also in our ability to deliver and support them over the entire product lifecycle. Our knowledge of the unique design, testing and life-cycle management issues of displays and computers for naval vessels has enabled us to develop high quality Naval products, which can be found in navigation, automation and C4i solutions aboard everything from aircraft carriers and destroyers to patrol boats and submarines.

We also provide dedicated ECDIS calibration which enables us to deliver type approved ECDIS displays straight from the factory to you.

RAISING THE STANDARDS

Hatteland Display naval products are tested according to MIL-STD-461, MIL-STD-810, MIL-STD-167-1 and MIL-S-901D, Grade A, Class 1, in addition to extended IEC 60945. We have Type Approval from all major marine classification societies, ensuring our marine displays, computers and panel computers are fit for the harsh environments encountered on missions at sea.

COTS OR CUSTOM SOLUTIONS

Hatteland Display has a proven track record of providing dependable solutions to systems integrators and Navies around the world, which is a reflection of our product quality, value and the trust which our customers put into our solutions.

In addition to our extensive portfolio of standard (COTS) products, Hatteland Display delivers custom and badged product solutions to some of the largest and best-known system providers in the industry. Our ability to provide tailored solutions and support high-volume production runs has led to lasting relationships with our customers.

Product innovation and flexible manufacturing are key to Hatteland Display's leadership strategy. We have made substantial investments in state-of-the-art design tools, environmental test equipment, manufacturing and quality systems and are recognized for providing the highest quality and best value in the Naval and Defense market.

PAST PERFORMANCE - NAVIES

Our products are in applications for navigation, automation and C4i on a wide range of military vessel types, including Aircraft Carriers, Destroyers, Frigates, Mine Hunters, Patrol Boats and Submarines.

Navies, among others, currently supplied by Hatteland Display

Belgian, Canadian, Chilean, Danish, Dutch, French, German, Greek, Indian, Italian, Japanese MSDF, Korean, Malaysian, Mexican, Norwegian, Polish, Royal Australian, Royal Navy (UK), Royal Navy of Oman, Singapore, South African, Spanish, Swedish, Turkish, UAE and US.

With this much experience you can be sure that Hatteland Display is a strong link in the naval supply chain.

Coastguards, among others, currently supplied by Hatteland Display

Germany, Japan, Jamaica, Netherlands, Norway and US.

Reference programs, among others, currently supplied by Hatteland Display

FREMM, BAM, Barraccuda, MIL-GEM, SOGIM, AWD, LCS, DEEPWATER, LHD/LHA, DDG/CG and LSD/LPD.
